SUMMARY

Computer Science Graduate with interest in Back-end Development. I possess professional experience building tools for financial inclusion at banks using CSharp. Have Academic experience in developing Android Applications using Java. Currently enrolled at University of Texas at Arlington and will be graduating by May 2021.

TECHNICAL SKILLS

- C#, Android, Java, Python, C, C++, MySQL, HTML, JavaScript, PHP.
- MySQL, PhpMyAdmin, SQLite, Firebase.
- Android Studio, IntelliJ, Eclipse, Git, Jupyter.
- Google Cloud Platform, AWS – EC2, RDS.

PROFESSIONAL EXPERIENCE

Atyati Technologies Pvt. Ltd. | *Bangalore, India* | Software Developer

Dec 2017 - Jul 2019

- **Project 1: Application for Last Mile Banking** | *ASP.NET, Microsoft SQL Server, C#, SSRS, Stored Procedures*
Developed an application for last mile banking which helps people in villages and far-by places to do their financial transactions by booking a time they would be available. Changes made in Stored Procedures helped to fetch data 30% faster.
- **Project 2: Back End Development for an Android Applications for a Bank** | *Microsoft SQL Server, C#, Stored Procedures*
Back end development for an android application for Shivalik Bank was done to handle many transactions like Balance Inquiry, Fund Transfer, RD, FD etc. Changes implemented in UI as well as the Backend added another layer of security to secure financial transactions.

ACADEMIC PROJECTS

- **Multi-Threaded Client Server Application** | *Java, Socket Programming*
Developed software for PC to implement a Multi-Threaded Client Server Architecture system using Java JVM and perform operations like Create, Delete, Rename, Replace and listing of directories. Additional operations like saving a copy of created directories in a local system and updating them accordingly is also done along with a button to Undo the operations done on directories.
- **Hotel Management System** | *Java, Android*
An Android Application developed to use in any Hotel to Aid in Hotel Management. Operations ranges in Creating profiles for guests, checking them in, Payment for booked room and much more.
- **Serve-Me System** | *Java, Android*
A Customer- obsessive Android Application developed to manage, and track orders placed according to priority and time. Work Orders will then be sent to nearest vendors with an asking price and availability.

ACADEMIC QUALIFICATIONS

University of Texas at Arlington | Master's in Computer Science
3.4/4 GPA

Aug 2019 - May 2021

SDM Institute of Technology | Bachelor's in Computer Science
7.4 CGPA

April 2013 - May 2017
